

tached to the underbarrel mount and provides 2 points of recoil compensation when properly deployed. Attaching or removing it takes a Complex Action.

**Concealable Holster:** Various types of holsters can be worn over the hip, in the small of the back, under the arm, on the forearm, or on the ankle. The concealable holster adds –1 to the item's Concealability (see p. 301).

**Gas-Vent System:** Gas-vent recoil compensation systems vent a weapon's barrel gases at a specific vector to counter barrel climb. Gas-vent systems can be built into machine pistols, SMGs, assault rifles, and machine guns. Installing them takes up the barrel mount and requires an Armorer + Logic (8, 1 hour) Extended Test; once installed, they cannot be removed. Weapons already equipped with a built-in gas-vent system cannot be equipped with an additional gas-vent system.

The gas-vent 2 system provides 2 points of recoil compensation; the gas-vent 3 system provides 3 points of recoil compensation.

**Gyro Stabilization:** This is a heavy upper-body harness with an attached, articulated gyro-stabilized arm that mounts a rifle or heavy weapon. The system neutralizes up to 6 points of recoil and movement modifiers. Attaching or removing a weapon takes a Simple Action. Getting into the gyro-mount takes 5 minutes, while using the built-in quick release to get out of it takes a Complex Action.

**Hidden Arm Slide:** Attached to the forearm and worn under clothing, this slide can accommodate a pistol-sized weapon. With a wireless signal or correct sequence of arm movements, the slide releases the weapon/object right into the wearer's hand. This takes only a Free Action.

**Imaging Scope:** These classic scopes are attached to the top mount; attaching or removing them takes only a Simple Action. Imaging scopes can be upgraded with any of the vision enhancements noted on p. 323.

**Laser Sight:** This device projects a laser beam to produce a glowing red spot on the target. This provides a +1 dice pool modifier for ranged attacks (this modifier is not cumulative with smartlink bonuses). The laser sight can be attached to either the underbarrel mount or top mount. Attaching or removing it takes a Complex Action.

**Periscope:** This adjustable "off-axis viewer" attaches to a top-mount and allows you to target a weapon around corners.

**Quick-Draw Holster:** This easy-access holster reduces the threshold for quick drawing the holstered weapon to 2 (see Quick Draw, p. 137).

**Shock Pad:** This shock-absorbing pad can be mounted on the rigid shoulder stock of a rifle, shotgun, or heavy weapon, and provides 1 point of recoil compensation.

**Silencer:** The silencer is a barrel-mounted accessory that reduces the sound and flash of a weapon's discharge. A silencer can only be used with single-shot or semi-automatic weapons (and not with revolvers). It applies a –4 dice pool modifier on all Perception Tests to notice the weapon's use or locate the weapon's firer. Attaching or removing a silencer takes a Complex Action.

**Smart Firing Platform:** This is a non-mobile robotic tripod (see below) equipped with a remote-control pivot that allows for a 180-degree firing arc (and a 60-degree inclination). A smartgun-equipped weapon mounted to the platform can be fired remotely or by the platform's Pilot. The platform is equipped with Pilot 3, Sensor 3, and one Targeting autosoft (see p. 240) at Rating 3.

**Smartgun System:** The smartgun system connects a firearm or projectile weapon directly to a user's smartlink (see p. 323). It incorporates a laser range finder and a small camera, and keeps track of ammunition, heat buildup, and material stress. It allows a smartlinked character to mentally switch between gun modes, eject clips, and fire the gun without pulling
