

Hold-Outs

Use the Pistols skill when firing a hold-out pistol.

Raecor Sting: This weapon’s “lemonsqueezzer” design (the gun’s barrel protrudes from between the firer’s fingers and it’s fired by making a fist) and its polyresin composition (undetectable by MAD scanners) makes for a very stealthy weapon. It fires flechette ammunition only (already included in the weapon stats).

Streetline Special: This small, lightweight weapon is made of composite materials (MADs suffer a -2 dice pool modifier to detect it, see p. 255). It is a common weapon among those on society’s bottom rung.

Light Pistols

Use the Pistols skill when firing a light pistol.

Colt America L36: An old-timer with a very good reputation, this sleek automatic pistol is easy to conceal and commonly available.

Fichetti Security 600: Designed as a light sidearm for security personnel, this pistol has a highly efficient feeding mechanism that allows it to hold an incredible 30 bullets. It comes fully equipped with a detachable folding stock and laser sight.

Hammerli 620S: Sleek and stylish, the Hammerli offers the range of a heavy pistol within a light pistol casing (use Heavy Pistol ranges, p. 139). It also includes integral gas-vent and smartgun systems.

Yamaha Sakura Fubuki: The “Cherry-blossom Storm” is the flagship for Yamaha’s new line of electronic weapons that feature no moving parts. Rather than a standard magazine, the bullets are stacked in-line in each of the four barrels, allowing the firing of ultra-fast short bursts. The Fubuki may only fire narrow bursts (not wide), but burst recoil is handled like SA recoil (-1 Recoil on the second burst each Action Phase only). Includes an integral folding stock.

Heavy Pistols

Use the Pistols skill when firing a heavy pistol.

Ares Predator IV: The all-time favorite sidearm among mercenaries and security services. Includes a smartgun system.

Ares Viper Slivergun: The Slivergun is a sleek weapon with burst fire capabilities and built-in sound suppression. It fires metal slivers that count as flechette ammunition (already factored in to the Damage Code).

Colt Manhunter: Popular among law-enforcement, the Manhunter features a built-in laser sight.

Remington Roomsweeper: This short-barreled “shotgun pistol” can be loaded with shot rounds rather than slugs, in which cases it uses heavy-pistol ranges but shotgun rules (see *Shotguns*, p. 144).

Ruger Super Warhawk: Feeling lucky, punk? This heavy revolver looks as scary as the holes it tears through things. It cannot be equipped with a silencer.

Machine Pistols

Use the Automatics skill when firing a machine pistol.

Ceska Black Scorpion: This classic machine pistol combines concealability with burst fire capabilities. It comes equipped with an integral folding stock.

Steyr TMP: This lightweight polymer-frame pistol is capable of full autofire, but its lack of recoil compensation makes it difficult to control.

Submachine Guns

Use the Automatics skill when firing a submachine gun.

AK-97 Carbine: The AK-97 has earned its fame in many campaigns around the globe. Its reliability is legendary—you can bury it for 10 years, dig it up and fire it immediately without a single problem. Includes a detachable folding stock.

Tasers	Damage	AP	Mode	RC	Ammo	Availability	Cost
Defiance EX Shocker	8S(e)	-half	SS	—	4 (m)	—	150¥
